About Fishtech (BD) Limited

Fishtech (BD) Limited is a Bangladesh based private limited company, established on the **23rd March 2005**. Initially it was engaged mainly in providing technical services to its clients for getting maximum benefits in fish, shrimp farming and hatchery operation. Considering the demand of the customers Fishtech eventually extended its area of activities by importing and selling some world class medicines, equipment and other necessary inputs which are necessary in fish, poultry and dairy farming. Fishtech has established a wide range of customer-base throughout the country. Beside business activities Fishtech has an organized and well equipped Research & Development (R&D) department headed by a director.

About Fishtech (BD) Limited

A highly skilled technical team of R&D department continuously performs research works towards finding out the ways of improving farming systems to make farming more profitable. With a view of improving sustainable aquaculture practices in Bangladesh, Fishtech provides training to the fish and shrimp farmers with its dedicated, trained and skilled members of technical team. Sometimes it organizes various kinds of programs like training, demonstration farm, seminar, group meeting etc., in collaboration with different government and non-government organizations. A constant endeavor of the company is to perform its activities in a way which helps to make a significant contribution for optimizing fish, shrimp, poultry and dairy production by ecofriendly farming practices and to make a significant contribution to the economy of the country.

Vision of Fishtech

Business operation of the company always prioritize human health. It also complies with the measures of food safety and environmental issues. Keeping these in mind the company has a clear vision to provide the fish, poultry, dairy and agricultural crop producers with necessary technical supports and quality inputs, so that they can get maximum possible benefits and can produce maintaining food safety measures.

Current Missions of Fishtech

- To aware the farmers about food safety;
- To train up the farmers on modern systems of raising fishes and animals;
- To establish probiotic based rearing practices;
- To eliminate or reduce use of antibiotics and different harmful chemicals, by modernizing culture systems;
- To increase production per unit area by adopting modern technologies;
- To supply nutritionally balanced, best possible performing and cost effective feed for the farmed animals.
